D. Rolin is the coordinator of the French MetaboHUB¹ proposal and has contractual responsibility for the project, its overall management, organization and control. D. Rolin has been Professor at Bordeaux University since 1994 and has recognized expertise in the fields of NMR spectroscopy, plant and fruit biology, metabolism, metabolomics and fluxomics. D. Rolin is also widely involved in the structuring of research efforts in the emerging field of functional genomics especially in metabolomics. He is heading « Bordeaux Functional Genomics Centre² » a federation of seven technological platforms (100 permanent staff in 2015), dedicated to the study of living organisms at cellular and molecular scales in the French Aquitaine Region. In 2002, he has set up and led the Metabolome Facility of Bordeaux (BMP) until 2008, which can be considered as a pioneer in plant metabolomics in France. D. Rolin is also deeply involved in the promotion of Metabolomics & Fluxomics in France as co-founder, treasurer (2007-2010) and President of the French Metabolomics and Fluxomics Network (2010-2015; RFMF³, a French Scientific Society created in 2005 that aims at the promotion of Metabolomics & Fluxomics in France). D. Rolin was co-organizer of nine national metabolomics congresses and two Scientific School for Metabolomics organized by RFMF at Montpellier in 2009 and in Nice in 2014.
